

Recover Fast. Stay in Control. Keep Operations Running.

Image-based backup and disaster recovery
built for critical OT/IT environments.

When Systems Fail, Every Second Counts

Ransomware, aging infrastructure and stricter SLAs put operations at constant risk of costly downtime. Prevention isn't always possible, so recovery must be fast, reliable and proven.

**With Macrium,
restore systems
in minutes,**

even in harsh,
legacy and
air-gapped
environments.

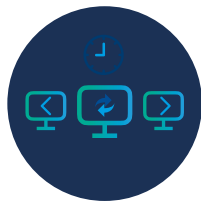

Fast, Reliable Recovery

Image-based backups and rapid recovery keep downtime to a minimum and operations running.

Built for Operational Reality

Backup live systems without disruption, from modern Windows endpoints to legacy factory-floor hardware.

No Bloat, Just Backup

Focused software with flexible licensing means you pay for what you need, nothing more.

Backup and recovery that just works!

Loved by engineers, OEMs and IT/OT security teams worldwide.

Why OT and IT Teams Choose Macrium

Proven Across Legacy & Modern Systems

Run backups and restores on endpoints from Windows XP/Server 2003 to current. No OS upgrades required.

Fast, Efficient Backups

Create image backups with minimal system impact, even on constrained networks.

Rapid, Reliable Restore

Reduce RTOs and get back online faster. Restore only changed data blocks with Macrium's Rapid Delta Restore.

Offline & Air Gapped Ready

Operate without internet access. Ideal for plants, remote sites or airgapped, remote zones.

No Bloat, Flexible Licensing

Annual or perpetual options that fit any environment, including stable, regulated deployments.

Designed for the Frontline

Built on deep expertise, Macrium makes recovery straightforward for frontline and non-specialist teams.

Trusted in Critical Sectors

Deployed across automotive, manufacturing, healthcare and infrastructure where downtime isn't an option.

Macrium Business Solutions

Reflect X

Standalone protection for workstations and servers. Ideal for small production lines (<10 endpoints).

SiteBackup

Centralized backup and recovery management across multiple systems, with real-time reporting dashboards and alerts.

Reflect LTSC

Perpetual licensing with a static features set for long term support. Perfect for embedded or regulated systems in the field.

The competitive edge that Macrium gives us is that now we're able to recover software or image issues remotely, which is truly unheard of in our industry. We were able to save approximately 50% in labour related to software reimaging issues.
